

International Journal of Computational Intelligence Research

Dear researcher,

I am pleased to announce the relaunching of the International Journal of Computational Intelligence Research (IJCIR) www.ijcir.com.

The objective of the journal is to provide the academic and industrial community with a medium for presenting and delivering high quality papers related to Computational Intelligence (CI) and its applications. Original and unpublished works devoted to either theoretical or methodological aspects of CI, as well as its applications in real world problems are invited and welcome.

After several years of existence as a traditional journal, IJCIR has undergone a major update in terms of the underlying philosophy and editorial policy. The most remarkable features to be noted here are:

- The journal has become open access and completely available through the Internet at the journal web page: www.ijcir.com.
- The whole editorial process from submission of contributions to publishing have become completely electronic, so they all have been updated. We have a strong commitment towards fast evaluation and publication.
- The journal will adhere to a rigorous policy of peer review to ensure that only contributions of high quality are accepted. It has a distinguished editorial board composed of widely recognized leading experts in the different fields of the area coming from various geographical regions of the world.
- Additional advantages and services available on the electronic support will be exploited. For example, the possibility of providing not only a pdf of the paper but also additional and enriched content like:
 - ▶ Data and/or code related to the paper.
 - ▶ Pointers for related material and new work.
 - ▶ Demos and presentation which help to expose the work.
- Papers published in IJCIR will have a DOI reference code so that they can be globally identified and better referred to.
- The journal web site goal is not just a permanent online repository. It will provide increasing facilities just like extensive searching possibilities; fora for paper discussions; e-mail distribution list to announce the publication of new content; etc.
- Ready-to-use images of the whole publication will be available for download to make easier off-line reading.

Should you have any questions about the journal, please do not hesitate to contact us.

Best regards,

José M. Benítez,
Editor-in-Chief

Emilio Corchado,
Co-Editor-in-Chief
